

ARM YOURSELF WITH KNOWLEDGE PROTECT YOURSELF FROM FRAUD

With the rise in scams, and their increasing complexity, here are some tips to identify common scams and protect your accounts.

- **Closely Monitor Your Accounts:** Frequently review account transactions through Online Banking. Contact us immediately if something looks suspicious.
- **Don't Share:** Do not share your Debit Card PIN, account number, or Online Banking password with anyone. If you receive a phone call, text message or email asking you to provide personal information, call the company directly to verify before providing any information.
- **Browse safely online:** Look for the lock button and "https" at the beginning of each website url to ensure it is a secure site. Don't make online purchases from companies you aren't familiar with.
- **Don't Take the "Phishing" Bait:** Avoid clicking on links or opening attachments from emails you are not expecting. Before clicking a link, hover over the link with your mouse and you can see where that link is directing you.
- **Beware of Payment Scams:** Scammers will often ask for payment in formats that can be difficult to trace. Only send money to people you personally know, and trust, via money transfer apps such as Cash App, Zelle or Venmo.
